

Secure and efficient handling of heavy cargo (HEA)

A functional tool for handling HEA to be used on conventional cargo loaders

Efficient cargo handling

- Easy operation allows for an efficient loading and unloading process of heavy cargo (HEA)
- The tiltable ramps secure a smooth transfer of HEA between the aircraft and the platform

Fewer aircraft damages and injuries

- Contributes to a more secure air cargo handling procedure
- The easy pedal operated ramps prevent potential damages to aircraft doors
- Reduced risk of falls due to the perfect alignment between the aircraft and the platform
- The stable platform improves ground handlers' safety during loading and unloading

Compatible with existing cargo handling equipment

- Can be utilized with various types of cargo loaders

Specifications

Max. load capacity on ramp: 800 kg / 1764 lbs

Compatibility: Compatible with most narrow-body aircraft

Standard features:

- Easy manual operation
- Pivot mounted flexible ramp that accommodates for sloping door sills
- Side-sliding ramp function (± 95 mm / $\pm 3,8$ inches)
- Security lock for hand pallet jacks
- Can be easily moved with a forklift
- Pedal operated ramps
